# C100R

Rayco's C100R Forestry Mulcher is the answer if you're looking for a purpose-built mulcher but need the versatility of rubber tracks. Our customers demanded a mulcher that was capable of crossing roadways and sensitive turf but still had the power and in-woods characteristics of a dedicated forestry machine. The C100R answers that call. It rides on a 17.7-inch wide steel-embedded rubber track. A reliable, 99hp Kubota diesel engine supplies power, while Rayco's exclusive Super Flow, closed loop hydrostatic system delivers mulching power not found in ordinary Compact Track Loaders. Purpose built for mulching, the C100R features a heavy duty rear door, hydraulic winch, and Rayco's exclusive elevated cooling design, which places engine radiators in both the rear of the engine compartment and in the limbriser for maximum cooling performance in the harshest climates.

## Specifications C100R

Weight	6,695kg
Length	468.6cm
Height	263.4cm
Width	196.6cm
Engine	99hp Kubota
Track Shoe	450mm Rubber
Mulcher Head	Predator FM100-6R
Cutting Width	180cm
Rotor Diameter	42.55cm
Rotor Speed	2,200rpm
Mowing Height	301.3cm
Teeth	36

## Features

- Purpose built forestry mower/mulcher
- 99 hp Kubota turbo diesel engine
- Super flow, closed loop hydrostatic cutter head drive
- Rayco-exclusive elevated cooling design
- 17.7-inch rubber tracks
- 2-speed travel
- Easily removable debris screens to protect coolers
- Hydraulic rear winch
- Rayco-exclusive forestry door with 1.25-inch lexan
- Escape hatches in rooftop and rear window
- Predator mulcher head with variable displacement hydraulic motor
