# RG45 DIESEL

Turbo diesel power, 4 wheel drive, and a hydraulic backfill blade. And it comes in a self-propelled package that fits through a 36" gate. The RG45 puts together all the features customers want and fits them into a compact diesel stump grinder. Operators appreciate the large cutting dimensions as well as visibility and protection of the swing-out control station. For travel through gates, the control station swings in line. Wide floatation tires and 4 wheel drive allow the RG45 to maintain traction in challenging conditions. A hydraulic backfill blade saves time during clean up, letting you get on to the next job.
