Joke of the Month

A husband and wife are trying to set up a new password for their computer. The husband puts, "My penis," and the wife falls on the ground laughing because on the screen it says, "Error. Not long enough."

CMC Lift Spring Special

Buy a CMC 15 mtr or 19 mtr and receive a **FREE TRAILER**

FREE TRAILER

CMC S15 - 15 mtr. \$79,900 plus GST

Compact and Highly Manoeuvrable

Quick to manoeuvre and easy to setup, the CMC S15 is one of the most compact of its type at only 3.4m long and 0.78m wide. It can pass through single doorways and manoeuvre in the tightest of spaces. The impressive height of 15m and outreach of 7m is achievable with the 80kg capacity basket.

FREE TRAILER

CMC S19 - 11 mtr. \$109,000 plus GST

Big Performance from a Compact Machine

The CMC S19 has a robust construction with a big outreach of 12m and huge levelling ability from its traditional 'spider' style pantograph folding stabilisers. The S19 is a compact machine with big performance.

- Angry Ant Review
- Angry Ant 1150 coming soon
- Rhino Stump Cutting Wheels

- New Knife Grinder in Melbourne
- CMC Lifts FREE Trailer offer
- Used Equipment deals

LOADS OF HANDLING

Load handling has just become affordable, thanks to the new Angry Ant DY840 loader from Global Machinery Sales.

If you're like me, then I'm sure at some point you've used one form of machinery for carrying logs from a backyard, feeding the chipper, loading logs into the back of a truck, or "landing" one of those five wrap hangs the climber has just sent down. If you've done everything just listed, you will appreciate just how valuable a decent machine is. They save time, make the job a lot easier and safer, and also put a bit of fun back into things! This is where the Angry Ant DY840 steps up to the challenge. The machine moves with ease due to its ultra-reliable and economic 24.5kw Kubota diesel engine and full Hydrostatic 4WD system with a top speed of 12kph. You won't be tearing up any nice lawns with this beastie either, but if you need extra traction it's just a flick of a switch away. The DY840 is a compact machine and very versatile. With its articulated steering the turning circle is just a little over 2m and can be driven through a gap marginally wider than 1.24m and higher than 2.1m. When the boom is extended it can reach 3m away.

The loader is also fitted with a quick coupling system so changing attachments can be done in a minute. If you can't find an attachment that suits your needs in the Angry Ant range, other well-known brands of loader attachments are interchangeable. This is very handy if you want to upgrade to an Angry Ant but keep your old attachments! Also available is the option for rear hydraulic output. With safety being paramount the standard features included are a rotating work light, reversing beeper, lights and cylinder protection to prevent boom failure.

I was lucky enough to trial the Angry Ant DY840 in my yard where there were plenty of logs to move around and lots of mulch to push into piles. As with all new machines it takes a little practice to master the controls, so I enjoyed the space of my yard to get to grips with things and test the boundaries of the loader. There was enough power to easily pick up large logs and I was surprised at the height I

could lift them. Pushing the mulch up was a cinch as well. Operations are from a combination of foot pedals, conveniently located switches and an ergonomic joystick. Maintenance is easy: the engine cover can be removed with four bolts, the instrument panel has warning lights for all systems and there is a pressure test connector for easy diagnosis in the unlikely event of a breakdown.

The DY840 weighs 1600kg so it is towable behind most modern utes. For \$39,900 plus GST it can be yours with a bucket of your choice, be it the log grab, leaf grab, 4-in-1 bucket, high volume bucket or even the auger drive.

Global Machinery Sales is confident in its products and the Angry Ant is no exception. This loader is backed with a three year warranty and a customer satisfaction history that is second to none. Even if you prefer to hire than buy, Global Machinery Sales can help as well.

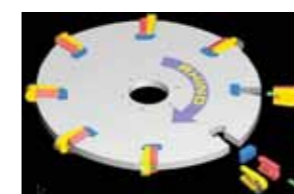

Rhino Wheel now available in Australia exclusive to Global Machinery Sales.

We are that confident you will love this wheel we offer 100% Money back on wheel and any unused teeth if not happy ! Advantages of the Rhino wheel cutting system are:

- Guaranteed 50% faster cutting speed than factory designs.
- 50% faster cutting means 50% more life of your grinder, more revenue.
- 50% faster cutting means 50% less fuel cost & 50% less labor cost.
- Drastically reduce down time of changing broken bolts & pockets.
- You can plunge cut or slew cut with the same tooth.
- The teeth are massive, to reduce broken teeth from exiting the wheel.
- No pockets or bolts to get in harms way
- Easy & fast teeth changing – 1 minute per tooth
- Teeth can be rotated to leader position, reducing teeth expenses
- Teeth can be re-sharpened & re-tipped
- Less maintenance on pillow block bearings, drive belts, and sheaves
- Super smooth cutting results in Less stress on the frame & drive system.
- More economical to operate because of less teeth on a wheel.
- Wheels cost less than of other aftermarket designs.
- We have most of the popular models in stock (Rayco, Vermeer, Carlton, Bandit, Morbark, Any that we do not have can be made upon request.
- If you fit all of your grinders with this wheel, you will be able to interchange all components (teeth, keeper blocks, bolts and nuts). That is a great advantage if you are short teeth on one machine, you can take teeth from a different machine until you get more teeth or parts ordered.

Rhino Stump Cutting Wheels are as tough as they come!

- They cut faster
- They last longer
- Need less maintenance
- 1 minute tooth change
- Fits all makes and models

WE GUARANTEE IT!

with a 100% money back guarantee on wheel and unused teeth.

What USA & European customers had to say

I have cut 150 stumps averaging 20" and only chipped 1 tooth
Johan A. – Sweden

We've cut all week on our Vermeer 252 and have not even rotated the teeth yet.
Gordy – California

I ground a 60" Oak 3 feet off the ground in 20 minutes with my RG85.
Jerry – California

I have ground for a month now and damaged only one tooth. These teeth cut like a Mad Dog.
Randy – Oregon

Not only do I have faster cutting but these teeth allow surgical accuracy when next to buildings. Working in rocky conditions is not a problem.
Jeff – Washington

"Holy sh*t. Absolutely incredible. I've been grinding since 1989 and have never seen such a resilient tooth. I am cutting faster than I could ever have imagined."
Chris B. – CT

My Rayco 1625 does not bog down with the Rhino when I am deep in the ground as compared to the Green Teeth I have been using.
Dennis H. – LA

I took 40 minutes with my Rayco 1645 to grind a 6 foot Oak stump with the Rhino wheel that use to take me 65 minutes to do with the Super teeth. That's 60% faster.
Mike H. – OH

I switched from the Yellow Jackets to the Rhino on our Vermeer 60TX and glad we did.
Vic D. -- WA

NEW ANGRY ANT DY1150

Arriving soon ,the biggest ant on the block

With the success of it's little brother & sister the DY620 & the DY840, we are proud to announce the arrival of the DY1150.
