Machine Overview: New Boxer Skid-Steer Loaders

## Boxer by Morbark

# Boxer Skid-Steer Loaders

Boxer Equipment develops a wide range of lightweight yet heavy-duty machines that generate an impressive amount of hydraulic power to lift more, move more and dig faster than any other product on the market. The choice of contractors and rental organisations, the Boxer is one of the most versatile, reliable and productive traction units in the world. The Boxer compact utility loader is an innovative machine that reduces the costs of performing key tasks and the process of improving the environments in which people live and work. Developed to replace hand labour, the Boxer provides a cost-effective, terrain-friendly solution for landscapers, irrigation contractors, plumbers, electricians, and property owners as they dig, trench, till, auger, demo, place materials, and perform a multitude of other tasks. Boxer Equipment has 4 skid-steer models available 300, 500, 700 and 900 series compact utility loaders, built to handle a full complement of more than 50 universal attachments. The Boxer's standard quick-attach system enables the user to quickly and easily switch from a bucket to forks to auger or other tools for optimum

on-the-job flexibility and bottom-line performance.

At the end of 2012, Boxer equipment was acquired by Morbark. Global Machinery Sales will now offer five different Boxer models for sale from September.

Boxer's 320 Skid-Steer Loader as part of the 300 Series, the Petrol powered 320 offers the power that Boxer has become known for in a smaller package, allowing you to reduce overhead and increase jobsite productivity. Designed to handle a full complement of attachments, the 320 helps minimize hand labor. Because of its reduced size and ease of operation, the 320 is ideal for the rental industry. This compact machine provides the strength to perform a variety of tasks and the versatility to get into tight area.

Next in line is the small but powerful Boxer 322D can handle "big machine" tasks while providing ease of access as a result of the smaller footprint. Able to handle a full complement of attachments, the diesel-powered 322D allows you to minimize hand

labor, reduce overhead and increase productivity.

The powerful 600HD powered by a 24.8-HP (18.5-kW) diesel engine and producing 11.3 gpm (43 l/min) of auxiliary hydraulic flow from the single remote auxiliary lines, this new model provides all the power needed for tough jobs. The 600HD features a 74" hinge pin height and a 280 kg rated operating capacity, with a tip capacity of 799 kg and fixed track width of 34.7". The 600HD boasts a variety of new features, including a redesigned platform with added creature comforts, hydrostatic drive, piloted joystick controls, rubber-isolated hydraulic components, tightened boom tolerances and a whole lot more!

The 700HDX features a unique hydraulically expandable undercarriage — from 35" to 43.5" allowing the operator to retract the undercarriage for passages as narrow as 36 (91 cm) wide then expand for increased stability while in operation by simply pulling or pushing a control lever. With a 24.8-HP diesel engine and 11.3 gpm hydraulic auxiliary flow, the 700HDX provides all the power you need for tough jobs.

## Rayco Stump Grinders

ARBOR AGE MAGAZINE

---

Global Machinery Sales have got a huge range of stump grinders so rest easy knowing they have got you covered when it comes to finding a grinder that's going to suit your needs perfectly.

---

Our stump grinder range comes to us from Rayco in the USA. Rayco are the market leaders for stump grinders and offer the ultimate in stump cutting performance. Rayco have 40 years of experience in creating unique, user-friendly stump grinders with simple, swing out consoles, remote control units, track and wheeled machines and a horse power ranging from 13 HP to 140 HP. Rayco have been UnStumpable since 1978 and Global Machinery Sales are proud to be the authorised dealer for these awesome machines in VIC, NSW, ACT, TAS, NT and WA. The New RG37XT is an excellent stump grinder for those who need a compact machine that has traction to get where tyres just won't take you. Now with the improved Vanguard 37hp EFI Engine. The rubber track undercarriage provides excellent traction while maintaining a low ground pressure. Unlike other track stump cutters, the Trac Jr's short track base allows it to turn easily and with less turf damage than competitors long track bases. Counter rotating tracks allow the machine to turn in place,

which makes it easy to re-position when cutting large stumps. A swing-out control station provides excellent visibility while cutting and swings in line for travel through gates. Two-speed travel and a hydraulic backfill blade rounds out the package makes the Trac Jr an excellent choice among compact stump cutters.

The RG45 Trac Remote offers the ultimate in versatility and performance in a mid-sized stump grinder. Excellent cutting power, radio remote controls, a hydraulic backfill blade, and expandable rubber tracks mean the RG45 Trac Remote can get to almost any stump and remove it quickly. The extendable, rubber track undercarriage provides a stable, 50-inch (127cm) wide, stance for cutting, while retracting to 35-inches. To squeeze through backyard gates. Rayco's newest stump grinder the RG74 Trac Remote offers versatility and performance whilst providing more cutting power than most 100hp stump grinders on the market. When it comes to engines, there's just no replacement for displacement.

The new Rayco RG74T-R, is a high-production stump cutter powered by a massive 3.8L Cummins 74hp diesel engine that generates peak torque of 295ft-lbs. The large displacement diesel engine delivers more cutting power than most 100hp-class stump grinders and meets Tier 4 Final emissions without complex after-treatment systems. Compared to the competition, the difference is clear.

Rayco pioneered the market with hydrostatic drive stump grinders and our flagship Rayco RG70X and RG100X offer the ultimate in backyard stump grinding performance. They use powerful Kubota diesel engines in 66.8hp (RG70X) and 99.2hp (RG100X) and have hydrostatic cutter wheel drive to let the operator vary cutter wheel rpm independent of engine speed. Wide cutting dimensions keep you working without repositioning the machine and the swing-out control station offers protection from flying debris while providing a good look at the cutting action.

Optional radio remote controls available.

## Call for a Price

The **Angry Ant DY620** Mini Loader packs a powerful punch, plus the added manoeuvrability of front articulation and hydrostatic 4WD. Powerful enough to handle the heaviest of loads and compact enough to work in tight areas. Quality engineered and backed by an experienced Australian service and parts network.

The powerful, lightweight and affordable **Morbark MXG50 Track Stump Grinder** is ideal for landscapers, stump grinding contractors and rental companies. Its compact size and power — combined with a 50" boom arc swing, maximum cutting height of 21 1/2" and maximum cutting depth of 16".

The **Rayco RC1220G** features a powerful feed system using a planetary drive motor to power the feed wheel for years of dependable service with very little maintenance. To reduce trimming, the throat opening is 20" wide all the way through to the drum, eliminating neck-downs behind the feed wheel.

The 15-inch capacity **RC1522 petrol wood chipper** is an economical solution for daily chipping needs, offering an excellent combination of chipping power, large feed opening, and easy maintenance. Features a 360 degree Hydraulic chute and Hydraulic winch included. Get in quick this won't last long!

## Bandit servicing? We've got you covered.

When it comes to Bandit Servicing in Melbourne, we have it covered for experience with Matt McDonald joining the team in our Dandenong South office. Matt worked at Bandit Tree Equipment in Melbourne for five years and has a tremendous understanding and knowledge of Bandit equipment. Matt joins long-serving Global employee, Bill Irving. Bill has been working on all wood chipper brands including Bandit for over 20 years. If you own a Bandit, Global Machinery Sales has you covered.
