SUMMER 2017

For a
STRONGER
Product Line

Morbark, LLC announced it has completed the acquisition of Rayco Manufacturing, Inc. This transaction represents the first addition since affiliates of the private equity firm Stellex Capital Management LP acquired Morbark in 2016. The purchase of Rayco represents a significant

move towards the Company's strategic focus on broadening the range of tree care and industrial equipment, aftermarket parts, and service offered to their Customers. Rayco was founded in 1978 in Wooster, Ohio, by John M. Bowling. Identified the unique needs of the tree and landscape

industry and began to build equipment to meet and surpass those needs. "Our family is very proud of the legacy we have established and nurtured over the past 39 years. We view today's transaction as an opportunity to continue growing our business."

Morbark “Strong” Wood Chippers

The Morbark wood chippers stocked by Global Machinery Sales range from 8 inch to 22 inch in diameter and are powered by CAT, Kubota, Kohler or Cummins engines from 37hp to 400hp. Morbark chippers are strong they chip strong and work strong. Morbark builds wood chippers that create opportunities for customers serving the forestry, recycling, sawmill, biomass, landscaping/irrigation, rental and tree care markets.

Morbark equipment helps customers harvest, process and convert organic materials into valuable, usable and environmentally sound products. With 60 years of ideas, invention and phenomenal growth, Morbark is recognised as a world-class manufacturing company with world-wide markets, and a reputation for designing and building robust, rugged and reliable heavy equipment.

The Beever M18R 20-inch Wood Chipper boasts a huge list of options to customise the machine as well as more standard features than any other chipper in its class. The unit can be outfitted with a four- or six-cylinder diesel engine and choice of single axle, tandem axle or single axle dual wheel package.

Available with ChipSafe.

RAYCO STUMP GRINDERS IN STOCK NOW

HUGE SAVINGS

Global Machinery Sales have got a huge range of stump grinders so rest easy knowing they have got you covered when it comes to finding a grinder that's going to suit your needs perfectly.

Our stump grinder range comes to us from Rayco in the USA. Rayco are the market leaders for stump grinders and offer the ultimate in stump cutting performance. Rayco have 40 years of experience in creating unique, user-friendly stump grinders with simple, swing out consoles, remote control units, track and wheeled machines and a horse power ranging from 13 HP to 140 HP. Rayco have been UnStumpable since 1978 and Global Machinery Sales are proud to be the authorised dealer for these awesome machines in VIC, NSW, ACT, TAS, NT and WA. The New RG37XT is an excellent stump grinder for those who need a compact machine that has traction to get where tyres just won't take you. Now with the improved Vanguard 37hp EFI Engine. The rubber track undercarriage provides excellent traction while maintaining a low ground pressure. Unlike other track stump cutters, the Trac Jr's short track base allows it to turn easily and with less turf damage than competitors long track bases. Counter rotating tracks allow the machine to turn in place,

which makes it easy to re-position when cutting large stumps. A swing-out control station provides excellent visibility while cutting and swings in line for travel through gates. Two-speed travel and a hydraulic backfill blade rounds out the package makes the Trac Jr an excellent choice among compact stump cutters.

The RG45 Trac Remote offers the ultimate in versatility and performance in a mid-sized stump grinder. Excellent cutting power, radio remote controls, a hydraulic backfill blade, and expandable rubber tracks mean the RG45 Trac Remote can get to almost any stump and remove it quickly. The extendable, rubber track undercarriage provides a stable, 50-inch (127cm) wide, stance for cutting, while retracting to 35-inches. To squeeze through backyard gates. Rayco's newest stump grinder the RG74 Trac Remote offers versatility and performance whilst providing more cutting power than most 100hp stump grinders on the market. When it comes to engines, there's just no replacement for displacement.

The new Rayco RG74T-R, is a high-production stump cutter powered by a massive 3.8L Cummins 74hp diesel engine that generates peak torque of 295ft-lbs. The large displacement diesel engine delivers more cutting power than most 100hp-class stump grinders and meets Tier 4 Final emissions without complex after-treatment systems. Compared to the competition, the difference is clear.

Rayco pioneered the market with hydrostatic drive stump grinders and our flagship Rayco RG70X and RG100X offer the ultimate in backyard stump grinding performance. They use powerful Kubota diesel engines in 66.8hp (RG70X) and 99.2hp (RG100X) and have hydrostatic cutter wheel drive to let the operator vary cutter wheel rpm independent of engine speed. Wide cutting dimensions keep you working without repositioning the machine and the swing-out control station offers protection from flying debris while providing a good look at the cutting action.

Optional radio remote controls available.
