RG100 DIESEL

Our flagship RG100X offers the ultimate in backyard stump cutting performance. It uses a powerful 99.2 hp Kubota diesel engine with a hydrostatic cutter wheel drive to let the operator vary cutter wheel rpm independent of engine speed. Wide cutting dimensions keep you working without repositioning the machine and the swing-out control station offers protection from flying debris while providing a good look at the cutting action. Low center of gravity and 4 wheel drive let them get to the stumps even in difficult terrain. Optional radio remote controls available.

Specifications RG100 Diesel

Weight	1,750.9kg
Length	365.8cm
Maximum height	185.42cm
